

Introduction

- In today's world with a huge population under poverty line . Many people don't even have food to eat. The main objective is to make such application in which any user can donate prepared food or money to the trust which helps needy .
- Each year about 1.3 billion tons of **food** are wasted and at the same time about 800 million people deprived of food.

Counter Hunger and Poverty simultaneously.

Objectives

- It assist in collecting the leftover food from hotels & restaurants to distribute among those in need.
- Avoid wastage of food .
- The application for food donation acts as an interface between the different parts of society.

Functionality

- User can do direct entry for the leftover food that has to be donated .
- The entry will be submitted to the trust which will do further procedure of quality check and distribution of food as soon as possible.
- User can also get info about the Institution to whom he/she is donating.
